An uncoated roof can absorb up to 83% of the sun's heat and UV rays.

A roof coated with a White Roof Coating can reflect up to 88% of the sun's heat and UV rays.

Energy Star™ Reflective Roof Coatings

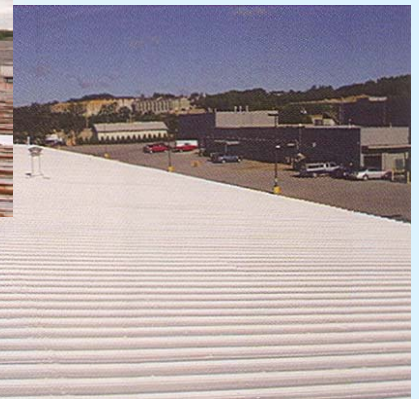

Provider Constructions highly reflective roof coatings and membranes are Energy Star certified, meet LEED requirements and have been used to restore millions of square feet of roofs across the nation.

Can be expensed in one year while re-roofs must be amortized!!!

Metal Roof Restoration

Put the product where the problem is; stop rust with the primer, stop leaks with our reflective roof coating, extend the roof life and cool the building with a reflective finish coat with over 25 years of proven history!

- ✓ No time consuming fabric installation required
- ✓ Coating is pumped and easily applied into place along seams/fasteners
- ✓ Primer and finish coats are rapidly pumped and spray applied to the metal surface
- ✓ Cool the building, stop the leaks and improve appearance with an attractive, flexible and durable membrane
- ✓ Highly reflective Energy Star qualified finish coat

Extend Your Current Roof Warranty!

Provider Construction offers the most competitive restoration warranties in the industry. Not only will you increase your ROI with restoration, you can also extend the life of the roof with an inspection and survey of your current roofing system. A Provider employee will determine how many more years of coverage are available through restoring your roof. Extended warranties are available in 5 and 10 year increments for qualifying roofs.

Single-Ply Restoration

Restore and preserve EPDM, Hypalon ©, PVC, CPA and other membranes with a low-cost alternative designed to extend the life of your roof.

- ✓ Provides protection against damaging UV Rays
- ✓ Stops Shrinking, chalking, and seam deterioration
- ✓ Eliminates water penetration
- ✓ Lowers the roof temperature which aids in reducing the rate of deterioration of components, immediately lowering energy costs and increasing a building owners Return on Investment
- ✓ FM and UL approvals

✓ **Licensed**

✓ **Insured**

Asphalt Restoration

Reduce the amount of cracking and deterioration of your asphalt roof and coatings by restoring them with our highly reflective elastomeric coatings.

- ✓ Adaptable to nearly every type of asphalt membrane
- ✓ Systems may be applied to new asphalt or modified bitumen to provide immediate protection from weather, UV degradation and chemical deterioration
- ✓ Lower the roof temperature, extend the roof life and aid the environment
